- **Programming:** JavaScript, Java, PHP, HTML, CSS, SQL, Dart
- **Frameworks & Technologies:** React, Flutter, Node.js, Express.js, MongoDB, Supabase
- **Tools:** Git, GitHub, GitLab, SonarQube, VS Code, Figma
- **Development Practices:** Agile/Scrum, CI/CD, Version Control, Responsive Web Development
- **UI/UX:** Wireframing, Prototyping, Usability Testing, User-Centered Design

Soft Skills

- Analytical & Critical Thinking
- Attention to Detail
- Problem Solving
- Communication & Teamwork
- Time Management
- Working Effectively Under Pressure
- Adaptability & Continuous Learning

WEBSITES & SOCIAL LINKS

Portfolio

Github

PROJECTS

FocusMate AI - Productivity Management Web Application

React, Supabase, JavaScript, PostgreSQL

- Developed a productivity web application featuring task management, Pomodoro-based focus sessions, authentication, and productivity analytics.
- Implemented and tested interactive features, focusing on functionality, usability, and reliable data handling.

File System Snapshot & Behavior Monitor

Java, Spring Boot, JavaScript, Node.js

- Developed a system to monitor file-system activities and track file operations through snapshots and behavioral analysis.
- Implemented monitoring, analytics, and report generation features, demonstrating problem-solving and attention to system reliability.

Personal Finance Management System

PHP, MySQL, Bootstrap, JavaScript

- Developed a web-based system for managing personal financial information with user registration, authentication, and data management features.
- Tested application functionality and handled validation and debugging to ensure reliable user interactions.

Pizza Ordering Mobile Application

Java, Android Studio, SQLite

- Developed an Android-based pizza ordering application with user-focused ordering and application management features.
- Implemented and tested core application functionality while troubleshooting issues to improve reliability and usability.
